#### **A word from some of our previous fellows:**

*“My expectations about the programme have changed, since the beginning of my fellowship. I noticed that my role in UNFPA was more than only about learning and building my professional capacity and skills, but it is part of a bigger strategy of changing the organization’s attitude and mindset towards young people and renewing itself.”*

*“The exposure and knowledge the fellowship has given me, will also be harnessed by young people in my country as I continue to work with them through various initiatives. I hope to share a lot with the young people in my country and work with them, contributing my new skills, to make our lives and situation better.”*
